

Gantry type 5-axis VMC – one compact machine, limitless applications

With a rotary table diameter of 600 mm, the G6 is a compact vertical machining centre designed for agile, smart machining of smaller workpieces requiring complex geometries and intricate features. This highly versatile VMC delivers full 5-axis CNC machining, with the built-in spindle moving along the X, Y, Z-axis, and the table moving in rotary C-axis and swivelling A-axis.

Snapshot of AXILE G6:

- // High-performance built-in spindle
- // Table moved by swivelling-rotary axes
- // Perfect U-shape closed-gantry design
- // Linear scales in all guideways
- // Highly fast and dynamic A/C axis movement based on torque motor technology
- // Large tool magazine as a standard feature
