

SC-300II

Nakamura-Tome

The Nakamura-Tome SC-300II is a robust, high-speed, high precision turning centre offering maximum versatility and productivity. With big bore capability and powerful cuts and a 10-inch chuck. The SC300II delivers high torque over a wide range, couple this with its massive cast-iron 45-degree slant bed, and you will be assured that full power is available under the heaviest of cutting conditions with no vibration or chattering.

Advantages of the SC-300II:

- // Massive 45 Degree slant bed for maximum rigidity
- // 22/18.5kW Wide-Range motor for powerful cuts
- // Quicker 'Non-lift' turret indexing to cut idle time
- // Box type slides and rigid turret for high accuracy
- // Bar capacity 71mm standard
- // All FANUC, CNC control and servo drives
- // Dodecagonal 12 station turret
- // High quality painting, as well as stainless covers
